- GENERAL NOTES
- The solution might require adaptation to local conditions ;
 - The implementation of the different components should be aligned by the contractor in the implementation phase, with the elements of the architectural project;
 - The dimensions are given as an indication, the contractor must confirm them in place and perform precise measurements before the work is done;
 - All dimensions must be confirmed with the architectural project;
 - All work must be done with particular care in order not to damage the pre-existing installation, to ensure the safety of the building and the workers;
 - Any discrepancies must be reported officially to the team planner;
 - This project must be read together with projects from other specialties.
