

Prevent and manage acute malnutrition and stunting through better nutrition counselling and better nutrition surveillance in Kassala State

FAQ 1_ December 19th, 2022

1. (....) no document (s) regarding the scientific background about the project was attached with the document received. If this is true and it is expected of applicants to develop the theoretical, scientific basis and background then it is OK.

The Guideline for grant applicant provides the necessary information regarding the expected outputs/results of the project. Is not compulsory for the applicant to develop a theoretical, scientific background of the intervention.

2. To enable us to submit our project proposal, we would like to request you to send the Project Proposal Templates/Application Package. We look forward to receiving the Project Proposal Templates/Application Package at your earliest convenience.

All the necessary Templates/Application Package can be downloaded at the following link:
